

## Twitter Hashtag Search

### Quartz Composer Plugin

<http://lacorporacion.tumblr.com>

0) Es necesario tener cuenta en Twitter

1) Luego crear una cuenta desarrollo

<https://dev.twitter.com/user/login>

2) En el portal de developer:

2.1) Click en “My Applications”

2.2) Click en “Create New App”

2.3) Completamos el formulario:

### Application details

**Name \***

Your application name. This is used to attribute the source of a tweet and in user-facing authorization screens. 32 characters max.

**Description \***

Your application description, which will be shown in user-facing authorization screens. Between 10 and 200 characters max.

**Website \***

Your application's publicly accessible home page, where users can go to download, make use of, or find out more information about your application. This fully-qualified URL is used in the source attribution for tweets created by your application and will be shown in user-facing authorization screens. (If you don't have a URL yet, just put a placeholder here but remember to change it later.)

**Callback URL**

Where should we return after successfully authenticating? [OAuth 1.0a](#) applications should explicitly specify their oauth\_callback URL on the request token step, regardless of the value given here. To restrict your application from using callbacks, leave this field blank.

2.4) Aceptamos los términos

[illegible]
